

NEW SERVICE

NORTHSIDE HOSPITAL

The Pediatric Center at Northside/Alpharetta

Arthrograms

Northside Hospital is pleased to announce a new service at the Pediatric Imaging Center. The Alpharetta Medical Campus now offers arthrograms. Arthrograms are performed by subspecialized musculoskeletal radiologists on many joints such as shoulder, hip, wrist, etc. to better delineate soft tissue structure such as tendons, ligaments and cartilage. A series of films, using both fluoro and basic x-rays are taken of the joint and often subsequent MR images are obtained. The addition of this new imaging procedure will provide you with excellence in orthopaedic image interpretation, patient care, consultation and customer service

Doctors and patients prefer Northside Pediatric Imaging for its convenience and high quality imaging services in a child friendly environment.

Advantages of Northside Pediatric Imaging include:

- Centralized scheduling
- No Backlogs for scheduled procedures
- Pre-certification available upon request
- Shorter commute/Easy access/Free Parking
- Child friendly environment
- Board-certified Radiologist sub-specialized in pediatric imaging
- Technologists trained in pediatric protocol
- No charge for CD or film copies
- Rapid Turnaround Time on Reports

Imaging services available include:

- X-Ray*
- CT
- Fluoroscopy
- Ultrasound
- MRI
- Procedural Sedation

* General pediatric X-Rays will continue to be available at our many other locations throughout north metro Atlanta.
