

# Lung Cancer Screenings

*Another Community Service Program of Northside Hospital Cancer Institute*

## Who Should Be Screened?

If you are a current or former smoker, speak with your physician to discuss the risks and benefits of receiving a CT lung cancer screening.

Eligibility Criteria*	
<b>Age</b>	55 – 77 years
<b>Symptoms</b>	Asymptomatic (no signs or symptoms of lung cancer)**
<b>Smoking History</b>	Current smoker or one who has quit within the last 15 years** 30+ pack year smoking history (a pack a day for 30 years or more)
<b>Screening Duration</b>	Screening should be discontinued once a person has not smoked for 15 years
<b>Shared Decision Making</b>	A shared decision making discussion is required with your physician to determine eligibility for an initial CT lung cancer screening.
<p><b>*Must have written order from physician</b>  <b>**Eligibility based on Medicare criteria</b></p>	

Resources to help you **stop smoking and using tobacco**

As part of our comprehensive approach to prevention and early detection, Northside Hospital's Built To Quit Program helps individuals quit smoking and using tobacco products.
