A Northside Network Provider

English - Spanish

PATIENT'S NAME: _____ DATE OF BIRTH: _____

BY SIGNING BELOW I ACKNOWLEDGE AND AGREE THAT:

Consent To Routine Procedures. I consent to medical care and procedures while I am a patient at THIS MEDICAL PRACTICE OR ANY OTHER Northside Network Provider ("Practice"). This includes non-invasive testing or procedures, such as routine exams, needle sticks, physical assessments and treatments, administration of medications, drawing blood, bodily fluids or tissue samples, insertion of tubes, imaging procedures or physical therapy ("Routine Procedures") recommended by my physician or other provider. I also consent to minor procedures performed under local anesthesia, such as bone marrow aspiration or removal of skin tags. ("Minor Procedures.")

The Routine Procedures may be performed by physicians, nurses, technicians, physician assistants or other healthcare professionals The Minor Procedures are performed by a physician or qualified midlevel provider. While these Procedures are routinely performed without incident, there may be material risks associated with each. It is not possible to list every risk for every Procedure, but in rare circumstances, the procedures may cause infection, loss of limb or function, damage to tissue or implants, paralysis or death. If I have any questions or concerns regarding these Procedures, I will ask my physician for more information. If I do not consent to a procedure, I will tell my physician or other provider when they recommend the procedure.

Testing And Disposition Of Specimens, Devices, Foreign Objects. I consent to each Practice or any lab used by the Practice retaining any tissue specimens, medical devices or foreign objects removed, expelled or otherwise separated from my body. If tissue specimens include products of conception or fetal remains, they may be disposed of by the lab after necessary examination. I agree that these items may be examined by pathologists, used for scientific or teaching purposes, and disposed of or retained according to the discretion of the Practice or lab, unless I request otherwise in writing before the procedure. I will let the Practice know if I have other requests for handling specimens. Any items I do not retrieve within fourteen days after the Procedure will be disposed of.

Consent To Download Prescription Records. Each Practice may download my medication history from pharmacies, health plans, and other healthcare providers and include it in my electronic medical record to improve the coordination of my medical care. This may include information about medications prescribed to me for mental health conditions, sexually transmitted diseases, substance abuse disorders, and HIV/AIDS. **If I do not want the Practice to obtain this information, I will cross through and initial this paragraph.** Refusal to allow downloading prescription records does not prevent my physician from viewing records under the Georgia Prescription Drug Monitoring Program for narcotics.

Testing For Blood-Borne Pathogens. Georgia law allows testing for blood-borne pathogens in certain situations. (1) If a health care worker is exposed to my blood (e.g., suffers a needle stick), my blood may be tested for diseases including HIV/AIDS. Additional information about this test is available. I will be informed of test results. (2) If I am an obstetrical patient in the third trimester of pregnancy, the Practice may test me for HIV and syphilis as required by Georgia law. If I want to refuse HIV or syphilis testing, I will cross out and initial this sentence. (3) For all other patients, if my physician recommends an HIV test, he or she will notify me and I will have the right to refuse the test at that time

Students. The Practice is engaged in health care education. At times care, examination and treatment may be delivered by students under the supervision of a physician or other authorized Practice personnel. Students will never have primary responsibility for my care; there will always be fully licensed health care professionals supervising the students and available to assist me. **If I do not want students to participate or observe my care, I will cross through and initial this paragraph.**

Medications From Outside Source. I agree to notify the Physician about medicines (including supplements and herbal products) that I am taking and to follow the Physician's instructions. If I bring medicine to the Practice for administration, the Practice may examine it so that it can be documented on my record, but the Practice is not responsible for the safety or proper dispensing of medication.

Privacy, Individuals Involved In My Care. I understand that, unless I request confidentiality, the privacy laws allow the Practice to communicate with family members or others who may be involved in my care. I agree that the providers can communicate with me in the presence of family members or others who come with me to my appointment. If I object, I will notify my provider and ask my family to leave when the provider is discussing care with me.

Telehealth. I consent to telehealth consultations recommended by my physician. During the consultation, my medical history and test results may be discussed with Georgia licensed health professionals through telecommunication technology. In some cases, a physical exam will be performed. Unless I object, a non-medical technician may be present to assist with the technology and, audio or video recordings may be taken. I can withhold or withdraw consent to the telehealth consultation at any time without affecting my right to future care, or risking the loss of any Medicaid benefits to which I may be entitled. If I do not consent to a telehealth consultation, some services may not be available at all Northside locations. I have been informed of available alternative options which may include in-person services. All state and federal laws, including privacy and confidentiality, apply to records of the telehealth consultation. The consulting physician will inform me of any other risks or benefits of the telehealth consultation. I have the right to see appropriately trained staff in-person immediately after the telehealth consultation if an urgent need arises. **If I do NOT consent to telehealth consultations, please cross out and initial this paragraph.**

PHOTOGRAPHY AND RECORDING. Providers may take photographs or videotapes of patients for medical documentation or identification. Photographs and related information may be published in professional journals or medical books, or used for any similar purpose in the interest of medical education, knowledge or research; provided, however, that in any such publication or use, I will not be identifiable. No protected health information will be released without my consent.
